

DEAR COLLEAGUES!

Our product range has been expanded with the new Pure sliding-door system. Pure has been created for relatively small sliding facades and a rather low load. It consists of specially developed profiles with undersized measurements that help to achieve a more elegant look of infills and avoid using fittings with excess strength.

It is worth mentioning that basic principles and simple assembly of aluminium standard systems for sliding wardrobes are preserved. Thus, the possibility of getting complaints while packing or assembling is much lower.

Key features of Pure system are unique stiles - stiles and top track allows to reduce thickness of infills to 60 mm

Installation of thinner fronts has a particularly positive effect in shallow closets in halls, the depth of which doesn't often reach even 400 mm.

Pure is also perfect for children's rooms that need compact, fine and light doors.

Due to special bottom rollers, the height of the bottom rail has been reduced to 43 mm.

PURE PROFILES ARE AVAILABLE IN 2 COLORS:

● Silver Matt

● Champagne Matt

Pure system includes 2 types of stiles: Contour and I. Each of them is a stylish analogue of standard profiles for large sliding doors that allows to combine different systems in one room.

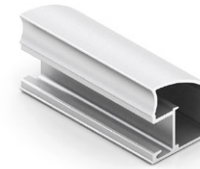

BENEFITS FOR FURNITURE MANUFACTURERS.

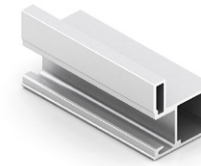

1. Simple and clear calculations, assembly and set up; low possibility of getting complaints
2. The system's pool of features and facilities has few analogs on the market which makes it extremely competitive.
3. Five types of packing sets and assembly make the system suitable for any type of room, from sales premises to children's units.
4. Recessed single bottom tracks eliminate dead zones significantly raising the efficiency of space usage and improving furniture ergonomic characteristics.
5. Favourable price.

BENEFITS FOR CUSTOMERS.

1. High reliability and perfect quality of movement that will be preserved for many years of usage.
2. Easy cleaning due to recessed single bottom tracks and dust protection gaskets.
3. Efficient use of inner space. Feeling of ultimate comfort and utmost satisfaction.
4. Pure design is along the lines with the standard systems and looks fine coupled with them in one room.
5. The top track positioner doesn't let the door jump and fixes it safely.
